Storege WMS User Manual

Overview

Storege WMS is a professional barcode + handheld warehouse management system for Saudi concrete plants, spare-parts workshops and vehicle consumables. 9 languages (Arabic/Urdu RTL), all prices in SAR, 15% tax.

Getting started

1) Sign in (admin@storege.app / Admin@12345). 2) Select a warehouse. 3) Add categories & items. 4) Add locations (rack/column R01-C01). 5) Start receiving (PO → receive → putaway).

Items

Manage items: SKU, EAN-13 barcode, cost/price, reorder point, strategic stock, lot/serial tracking, max stock, reorder qty. CSV import/export.

Locations

Multiple warehouses, zones, locations (PICK/DOCK/STAGING/SHIPPING/QUARANTINE), capacities, barcodes, rack/column (R01-C01).

Purchase orders

Create PO from supplier, partial/full receive, ASN number, putaway to locations, cancel receive by reversing movements.

Receiving

Receive against PO, lot code/expiry/serials, choose location, putaway suggestion (consolidate/empty).

Sales orders

Create SO from customer, FEFO auto-allocation, allocate stock, statuses OPEN/ALLOCATED/PICKING/PICKED/PACKED/SHIPPED.

Picking

Pick tasks per allocation, picked quantities, staging location, wave/batch picking for multiple orders.

Pack & ship

Pack all lines, ship with carrier/tracking, reason/vehicleRef/issuedTo, print Issue Permit.

Transfers

Between warehouses: draft → in transit → receive, lot/serial tracking.

Cycle counts

Count by location/zone/warehouse, enter counts, variances, approve to adjust stock.

Inventory

Real-time balance per item/location/lot/serial, manual adjust with reason, move, stock ledger.

Totals

Aggregated view: units, SKUs, stock value, reserved/available, by warehouse/category, strategic alerts.

Reports

Stock valuation, low stock, expiry, movement, dead stock, productivity, top items, ABC, count accuracy, purchase reconciliation, wave picking.

Purchase reconciliation

Compare invoiced quantities vs received vs on-hand (variance/status).

Barcodes & labels

Camera/USB scanner, EAN-13/Code128 generator, label designer, A4/thermal print, ZPL export.

Handheld (/m)

Mobile UI for receive, putaway, pick, count. Offline (IndexedDB) + queue + idempotency (X-Op-Id).

Settings

Company data, logo upload (650KB), currency (SAR), tax 15%, labels, barcode prefix.

Users & roles
